HOW TO USE THIS INDEX

This index is divided into five parts:

1. *AUTHOR* portion is arranged alphabetically and contains entries for both authors of articles and authors of book reviews. All contributions of one author are listed alphabetically under the last name of that author. Entries are also made for joint authors. Volume and issue number, quarter of the year i.e., Summer, Fall, Winter, Spring, the date and pagination are provided for each entry.
2. *TITLE* portion is arranged alphabetically omitting the initial articles. The title is followed by name of the author (or authors), volume and issue number, quarter of the year, date, and pagination.
3. *SUBJECT* portion is arranged alphabetically by subject heading. Under each subject heading items are listed by the name of the author (or first in a joint endeavor), volume and issue number, quarter of the year, date and pagination. Because the title of the article is NOT given, the user may wish to consult the author portion of the index for this information.
4. *BOOKS AND REVIEWS* section is arranged both by author and by title of the book. Entries are also made for joint authors. Each entry contains the name of the person who reviewed the book. This is followed by volume and issue number, quarter of the year, date and pagination.
5. *MISCELLANEOUS* portion contains information as reported in the *Journal* column of the same name. This miscellaneous information includes personnel appointments, conferences and institutes, grants, awards, new courses, publications and schools, notice of accreditation, committees, fellowships and scholarships, lecture series, retirements, and deaths.

Acknowledgement

My thanks go to two good friends, Francis Miksa and Elspeth Pope, both of whom read the manuscript and gave me helpful suggestions in my preparation of the index in its final form. I am also indebted to Janet Phillips who unselfishly gives me the benefits of her many years' experience which daily support me in my efforts as editor of the *Journal*. The end product is, of course, entirely my responsibility and I welcome constructive comments from those who use the index.
